

Contents

- 3 Contents
 5 Preface
 7 Conference Photo
- General Monitoring**
- 11 R. D. Gregory, D. Noble, R. Field, J. Marchant, M. Raven, and D. W. Gibbons :
Using birds as indicators of biodiversity
 25 J. R. Sauer: Developing a general conceptual framework for avian conservation
science
 33 C. Stoate, M. Araújo and R. Borralho: Conservation of European farmland birds:
abundance and species diversity
 41 A. Aunins and J. Priednieks: Bird population changes in Latvian farmland, 1995-
2000: responses to different scenarios of rural development
 51 T. Wesolowski: Bird community dynamics in a primaeval forest - is interspecific
competition important?
 63 M. Husby: Point count census using volunteers of terrestrial breeding birds in
Norway, and its status after six years
- Monitoring waterbirds**
- 75 M. Kershaw and P. A. Cranswick: Deriving population estimates for wintering
wildfowl in Great Britain
 89 V. Stanevičius: Monitoring of breeding water birds in Lithuania: organisation and
sampling designs
 95 S. Švažas, L. Balčiauskas and L. Raudonikis: Lithuanian wetlands database: the
tool for bird monitoring and conservation in Lithuanian wetlands
 105 T. M. Brereton, C. Weir, M. Hobbs and A. D. Williams: A low-cost, year-round
seabird monitoring programme in the English channel & Bay of Biscay: prelimi-
nary results 1995-2001
 115 M. J. Hobbs , T. Brereton, C. Weir and A. Williams : Baseline Monitoring data on
Procellariiformes (Shearwaters) in the Bay of Biscay
- Monitoring of single species**
- 129 N. Schäffer and U. Mammen: International corncrake monitoring
 135 O. V. Sukhanova and A. L. Mischenko: Monitoring Corncrake *Crex crex* numbers
in European Russia: the first stage
 143 W. Wettstein and T. Szép: Status of the Corncrake *Crex crex* as an indicator of
biodiversity in eastern Hungary
 151 O. Keišs: Recent increases in numbers and the future of Corncrake *Crex crex* in
Latvia
 157 A. Bea, R. Beitia and J. M. Fernández: The census and distribution of wintering
woodpigeons *Columba palumbus* in the Iberian peninsula
 169 T. Szép, Z. Szabó D and J. Vallner: Integrated population monitoring of sand mar-
tin *Riparia riparia* - an opportunity to monitor the effects of environmental disas-
ters along the river Tisza
 183 H. Oelke: Swallow censuses in Northwest Germany (1986,1991 and 1996)

- 191 J.Krogulec and J.Kloskowski: Monitoring Aquatic Warbler *Acrocephalus paludicola* in Poland

Models and Methods

- 199 J. A. Robinson and P. A. Cranswick: Large-scale monitoring of the effects of human disturbance on waterbirds: a review and recommendations for survey design
- 209 M. J. Steinkamp, B. G. Peterjohn, and J.L. Keisman: Incorporating precision, accuracy and alternative sampling designs into a continental monitoring program for colonial waterbirds
- 217 J.R. Sauer and W. A. Link: Hierarchical models and the analysis of bird survey information
- 223 P. Tryjanowski, M. Hromada, M. Antczak, J. Grzybek, S. Kuźniak and G. Lorek: Which method is most suitable for censusing breeding populations of red-backed (*Ianius collurio*) and great grey (*I. Excubitor*) shrikes?
- 229 I. Vilka: On the importance of nestbox age in monitoring populations of small hole-nesting birds

Short Communications

- 239 J-M. Boutin, D. R. and C. Eraud: Breeding Bird Monitoring in France: The ACT Survey
- 243 G. Aubrecht: Ornithological databases for science and conservation - management and project oriented studies
- 245 D. Callaghan: Pan-European monitoring of Important Bird Areas
- 249 A. Kalvans and O. Keiņš: The Breeding Bird Atlas of Jelgava district, Latvia
- 253 H.-G. Bauer, W. Fiedler and H. Stark: Four decades of waterfowl counts at pre-alpine Lake Constance
- 257 M. Vavoič: 15 years of monitoring of 'large' gull species in central and northern Moravia, Czech Republic
- 263 A. Pellingner: Waterbird-monitoring in the reconstruction habitats in the Lake Fertő, North-west Hungary
- 267 U. Mammen: No Chance for an European Monitoring of Raptors and Owls?
- 271 I. Kitowski and E. Wojtak: Distribution of Little Owl *Athene noctua* and Barn Owl *Tyto alba* in the Zamość Region (SE Poland) in the light of atlas studies
- 275 A. Gołowski, Z. Kasprzykowski and M. Kowalski: The occurrence of the Barn Owl *Tyto alba* in sacred buildings in central-eastern Poland
- 279 I. Kitowski and G. Grzywaczewski: The monitoring of Little Owl *Athene noctua* in Chełm (SE Poland) in 1998-2000
- 283 B. Houdková and P. Musil: Trends in numbers of the Coot (*Fulica atra*) in the Czech Republic in 1988-2000
- 289 S. Y. Dalakchieva: Changes in the number of the breeding population of kentish plover *Charadrius alexandrinus* at Atanasovsko lake
- 293 Y. Ferrand, F. Gossmann and C. Bastat : Breeding woodcock (*Scolopax rusticola*) monitoring in France
- 297 C. Stoate, R. Borralho and M. Araújo: Abundance of Four Lark Species in Relation to Portuguese Farming Systems
- 303 A. Surmacki: Use of playback in estimating number of Bearded Tit (*Panurus biarmicus*) in non-breeding season
